

Technology Enhanced Learning
Special Interest Group of ASME

Technology Enhanced Learning

Who are TEL?

The Technology Enhanced Learning (TEL) Special Interest Group was formed in May 2012 to provide a forum for sharing best practice and fostering collaboration. It is aimed at medical educators who use **TEL** in their teaching, **TEL** specialists who develop and shape **TEL** practice within their organisations or at a national level and researchers of **TEL**.

Aims

The TEL group aims to share knowledge and disseminate best practice. In particular the group has identified the need to develop a robust evidence base to support and inform the use of TEL, and to identify the impact. To date members have identified the following themes and interests:

- 🔥 Implementation of TEL and toolkits of best practice
- 🔥 Mobile technology
- 🔥 Staff development
- 🔥 New pedagogies afforded by TEL
- 🔥 Research and evaluation to build an evidence base
- 🔥 Online assessment and feedback
- 🔥 Virtual patients and simulation

We plan to take these forward by collaborating with others and holding events and meetings. Partners include: HEA medical and health professional cluster; ASPiH and other ASME SIGs.

For more information, email tel@asme.org.uk or visit our website for a list of all membership benefits and details of how to join online.
